EDUCATION

Bachelor of Engineering in Computer Engineering, Vidyalankar Institute of Technology May 2022
CGPA: 7.9/10 — University of Mumbai

EXPERIENCE

Software Development Engineer I – Senior Front-End Developer: Jio CloudXP July 2022 – Present
Reliance Jio Platforms Limited Navi Mumbai, India

- Created a comprehensive UI for CloudXP’s Billing Module using MEAN Stack, simplifying billing, transactions and reporting, reducing data retrieval time by 40%.
- Implemented features such as price book management, invoice management, facilitating seamless transfer of large data sets through the UI, along with an advanced reporting system, enhancing the responsiveness of the UI by 32%.
- Led a team of UI developers, providing mentorship and guidance, which improved overall team efficiency and project delivery times by 30% .
- Collaborated with stakeholders to refine 50+ requirements, reducing ambiguity by 37%, accelerating delivery by 18%, and boosting user satisfaction by 15% through alignment with strategic objectives.
- Enhanced common components for the project, significantly aiding other module UI developers and enhancing overall development efficiency by 10%.
- Refactored a complex application component by decomposing it into modular child components, achieving an 87% reduction in size from over 7000 lines of HTML and 8000 lines of TypeScript to under 900 total combined.
- Overcame Oracle SQL limitations by migrating a critical and complex procedure to GoLang, enabling parallelism and optimistic execution, significantly improving scalability and performance of the system’s core logic.
- Developed and integrated a GoLang-based service that securely fetches files from the Azure portal, downloads them locally, and processes them for further handling, previously managed entirely in Oracle SQL.
- Designed and implemented scalable REST APIs that facilitated seamless communication between microservices, leading to improved integration efficiency and a reduction in system downtime by 5%.

Head of Web Development April 2020 – February 2022
Storiyaan: Stories That Inspire Mumbai, India

- Optimized the official website using advanced WordPress techniques, increasing performance by 75%.
- Led a team of 13 members, achieving 'Employee of the Month' 6 times and 'Best Web Developer' 4 times.
- Enhanced interpersonal and interview skills through collaboration with 20+ high-profile personalities.

PROJECTS

Object Detecting Intelli System (O.D.I.S): Built an AI tool identifying visible objects in real-time with 90% accuracy. **Tech Stack:** ml5.min.js, HTML, CSS, JavaScript.

Emotion Classifier using NLP: Developed a sentiment analysis system to classify text sentiments and detect emotions, achieving 62% accuracy. **Tech stack:** Python, NLTK, Anaconda, Streamlit, TensorFlow, scikit-learn.

SKILLS

Programming Languages	C#, JavaScript (Node.js, P5), TypeScript, Java, Go Lang, Python
Web Development	HTML5, CSS, SCSS, Angular, Bootstrap, Tailwind
Database Management	SQL
Tools	Git, Azure DevOps, Spring Boot Tool Suite, WordPress, Figma, MS Office, Oracle
